## WEBSITES, EMAIL CAMPAIGNS....

We specialise in designing functional, user focused websites to simultaneously meet the needs of the client and the user. Our core skills are in website design, email & newsletter design, online banner ads, search engine optimisation, corporate branding, website hosting services and content managed websites.

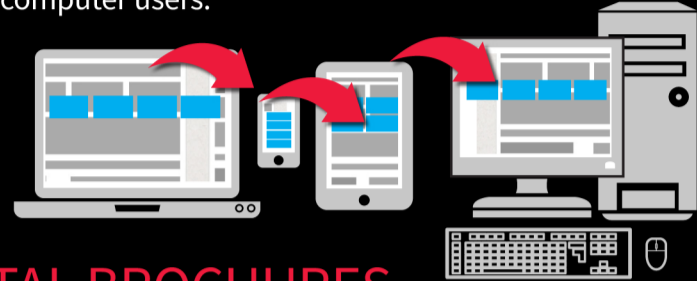

**HTML EMAIL CAMPAIGNS**  
We provide a full HTML email campaign service from design through to functionality.

## RESPONSIVE WEBSITE

from £750. Call for Details

With mobile use on the rise, more and more people are browsing the web from several different devices. Responsive website design allows your site to respond directly to the device that it is being viewed on.

The result is an optimal viewing experience for smartphone, tablet and desktop computer users.

## DIGITAL BROCHURES

You've designed your brochure and got it in PDF format. Now it's time to think about distribution and reaching all your target market. Is traditional print the only option? We do not think so. Why not send a digital version of your brochure delivered as a link to clients via multiple online channels. More and more people are viewing information in this format and we can guide you through the process. Send an email to hello@lateralline.co.uk and one of our team will get back to you.

## FILM & DIGITAL

### Video Production, Editing and Shooting

Producing a good video can be hugely effective on your business. We realise that not every company has the manpower or the know how to make this happen. That's where we come in.

No matter how small or large the job, we provide camera operation, sound recording, lighting, editing, compression and codecs, motion graphics, DVD authoring and web video.

Get in touch and let us help you to fully utilise video in your business.

## DIGITAL SCREENS

One of the core specialities of our multi-disciplinary team is conceptualising and developing digital signage solutions for various companies. We provide digital screen solutions from retail to restaurants.

Image manipulation, video editing and production, content acquisition, and content zoning. Our designers understand the unique design principles required to make on-screen communication effective.
